ISHAAN SHARMA

+91 8307982923 | sharmaishaan0901@gmail.com | linkedin.com/in/IshaanSharma195 | github.com/Ishaan0901 | Portfolio

PROFILE SUMMARY

B.Tech AI/ML student building production-style LLM applications, with hands-on experience in RAG, tool-calling agents, and FastAPI backends. Shipped a RAG-based medical knowledge assistant, a LangGraph job-search agent, and a self-healing LangGraph coding agent, and built a RAG incident chatbot as a team lead during a summer internship. IBM-certified in RAG & Agentic AI, with a grounding in classical ML (feature engineering, model evaluation, SHAP) and Streamlit deployment. Seeking an entry-level AI, GenAI, Agentic AI, or Forward Deployed Engineer role.

EDUCATION

J.B. Institute of Technology, Dehradun Aug 2023 – May 2027
Bachelor of Technology – AI/ML

SD Public School, Yamunanagar Apr 2021 – May 2023
Senior Secondary (PCM)

EXPERIENCE

AI/ML & Data Science Intern (Team Lead) — JSL Works Pvt Ltd Aug 2026 – Sep 2026
Remote

- Led Team SirenSense in building Siren Sense, an AI-powered traffic and emergency command system, coordinating planning, task division, and final submission over 6 weeks.
- Designed and built the Incident Assistant, a layered RAG chatbot: exact database queries for counting questions, TF-IDF and cosine-similarity retrieval for open-ended ones, and Claude-generated answers grounded in stored incident records.
- Added an offline extractive-summary fallback so the chatbot keeps working without an LLM API key, and tested and refined retrieval until answers matched the records.
- Integrated the chatbot into the live dashboard and authored the project documentation, covering architecture, setup instructions, and demo flow.

PROJECTS

MediBot — Medical RAG Knowledge Assistant July 2026
Python, LangChain (LCEL), FAISS, HuggingFace Embeddings (BGE), Mistral AI, Streamlit
Code: github.com/Ishaan0901/MediBot

- Engineered a RAG pipeline over open-access medical literature (NCBI StatPearls web pages and PDFs), using RecursiveCharacterTextSplitter (1000/100 overlap) and local BAAI/bge-small-en-v1.5 embeddings indexed in FAISS with MMR retrieval to reduce redundant context.
- Built a LangChain LCEL chain (retriever, prompt, Mistral AI) returning answers with source attribution and supporting passage snippets.
- Shipped a Streamlit chat UI with cached model/index loading and multi-turn session history.

JobPilot AI — Agentic Job Search Assistant Sep 2026
Python, LangGraph, Groq, ChromaDB, Adzuna API, Streamlit
Code: github.com/Ishaan0901/JobPilot_AI | Live: jobpilotai-ef6m2atix6t98dgnnuzqdj.streamlit.app

- Built a LangGraph tool-routing agent that decides, for each query, whether to retrieve from an uploaded resume via RAG, search live job openings through the Adzuna API, or research companies on the web.
- Implemented a RAG pipeline over the uploaded resume with ChromaDB so answers are grounded in the user's own experience and skills.
- Streamed grounded answers into a Streamlit chat interface and deployed it live on Streamlit Community Cloud; reached 8+ unique viewers.

DevForge AI — Autonomous Self-Healing Coding Agent Oct 2026
Python, LangGraph, LangChain, Groq (gpt-oss-20b), FastAPI, Pydantic, Streamlit
Code: github.com/Ishaan0901/DevForge_AI

- Built an autonomous coding agent in LangGraph that generates Python programs and websites from plain English, executes them, reads errors, and self-corrects through a tool-calling retry loop (3 retries, recursion limit 15).
- Designed 4 agent tools (write_code, execute_code, check_result, write_html_code) with conditional routing and a 10s execution timeout.
- Exposed the agent through a FastAPI REST endpoint with Pydantic validation, decoupled from a Streamlit UI showing code, output, errors, and live website preview.

CERTIFICATIONS

IBM RAG and Agentic AI — Professional Certificate (10 courses), IBM · Coursera — Verify Aug 2026
Machine Learning with Python — Course Certificate, IBM · Coursera — Verify Aug 2026
Database Structures and Management with MySQL, Meta · Coursera — Verify Aug 2026

TECHNICAL SKILLS

Languages: Python, SQL
GenAI & Agentic AI: LangChain (LCEL), LangGraph (Parallel & Sequential Workflows), RAG (FAISS, MMR, HuggingFace Embeddings), NLP (TF-IDF), Multi-Agent Orchestration, Tool Calling, Human-in-the-Loop, Agent Memory, Prompt Engineering
LLM Providers & APIs: Mistral AI, Groq, Google Gemini, NVIDIA AI, Hugging Face (Transformers), FastAPI, Pydantic
Machine Learning & Deep Learning: Scikit-learn, XGBoost, TensorFlow, Keras, Data Preprocessing, Feature Engineering, ML Pipelines, Model Evaluation, Hyperparameter Tuning, SHAP
Data & Databases: Pandas, NumPy, Matplotlib, Seaborn, MySQL, PostgreSQL, ChromaDB
Developer Tools: Git, GitHub, Docker, Jupyter Notebook, Streamlit, VS Code
